Coordinating international operation “Black Tulip”

Black Tulip – is a long-term multilateral international operation aimed at interdicting activities of African transnational drug trafficking organizations (DTOs), which have established sustainable delivery channels of opiates originating in Afghanistan through the territory of CARICC member-states.

CARICC in the Global Shield Operation

Goal of the Operation : to detect and interdict diversion channels into illicit trafficking of precursors used in the manufacture of improvised explosive devices (IEDs).

85% of all terrorist attacks in the world are committed by IEDs.

A role of CARICC as a regional communication hub:

- ▶ collection and analysis of information on seizures of precursors in CARICC member-states;
- ▶ identification of high-risk deliveries of chemical precursors to the region;
- ▶ coordination of joint inspections into seizures of precursors and their high-risk deliveries.
